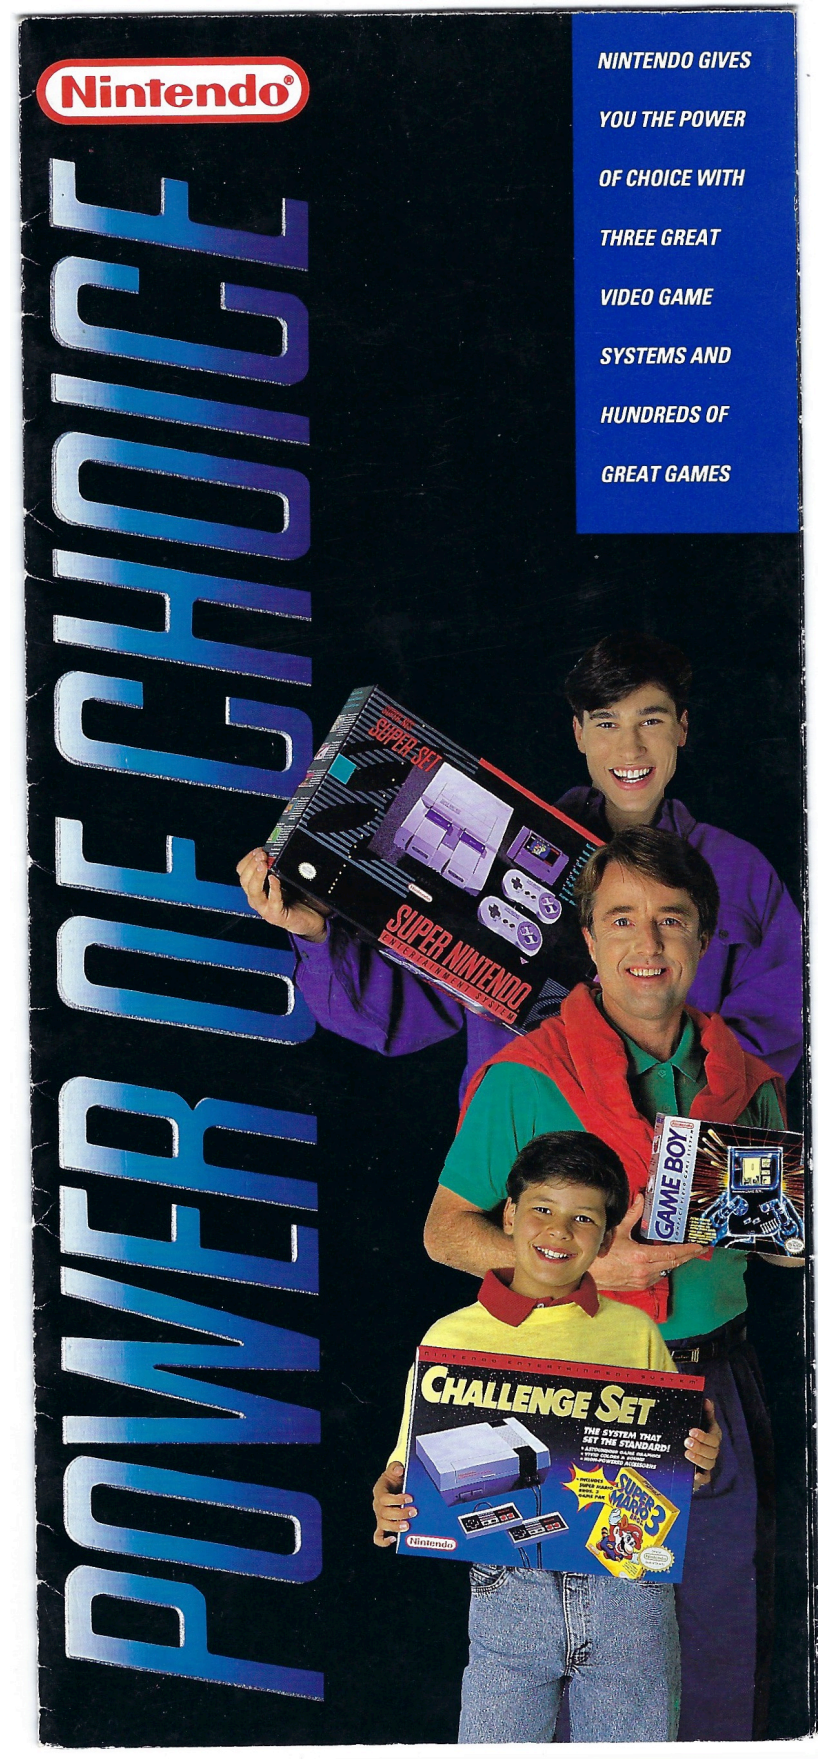
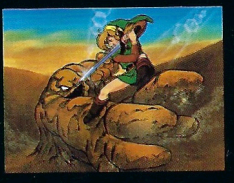
Nintendo

POWER OF CHOICE

NINTENDO GIVES YOU THE POWER OF CHOICE WITH THREE GREAT VIDEO GAME SYSTEMS AND HUNDREDS OF GREAT GAMES



All three Nintendo® hardware systems are different. Yet there's one thing they all have in common. Every Nintendo system creates fun. When it comes to video game excitement, no other system comes close to a Nintendo system for game selection, creativity and value. Through software, accessories and system design, the Nintendo Entertainment System,® the Super Nintendo Entertainment System® and the Game Boy® system are each the best of their type. And each offers a completely different video game experience. From the incredibly popular NES,™ an ideal system for beginning and intermediate players, to the state-of-the-art 16-bit Super NES™ for the player that is ready for the next level of challenge, to the completely portable, personal Game Boy system, Nintendo has the hardware and software that will be just right for you. To help you make the right choice, read this brochure. You'll get straight answers to the most often asked questions. Then call Nintendo toll-free at **1-800-255-3700**. We'll direct you to your nearest Nintendo retailer for a close look at all three systems and a hands-on demonstration before you make your choice. You'll find a whole world of adventure, fun and excitement in every Nintendo system.

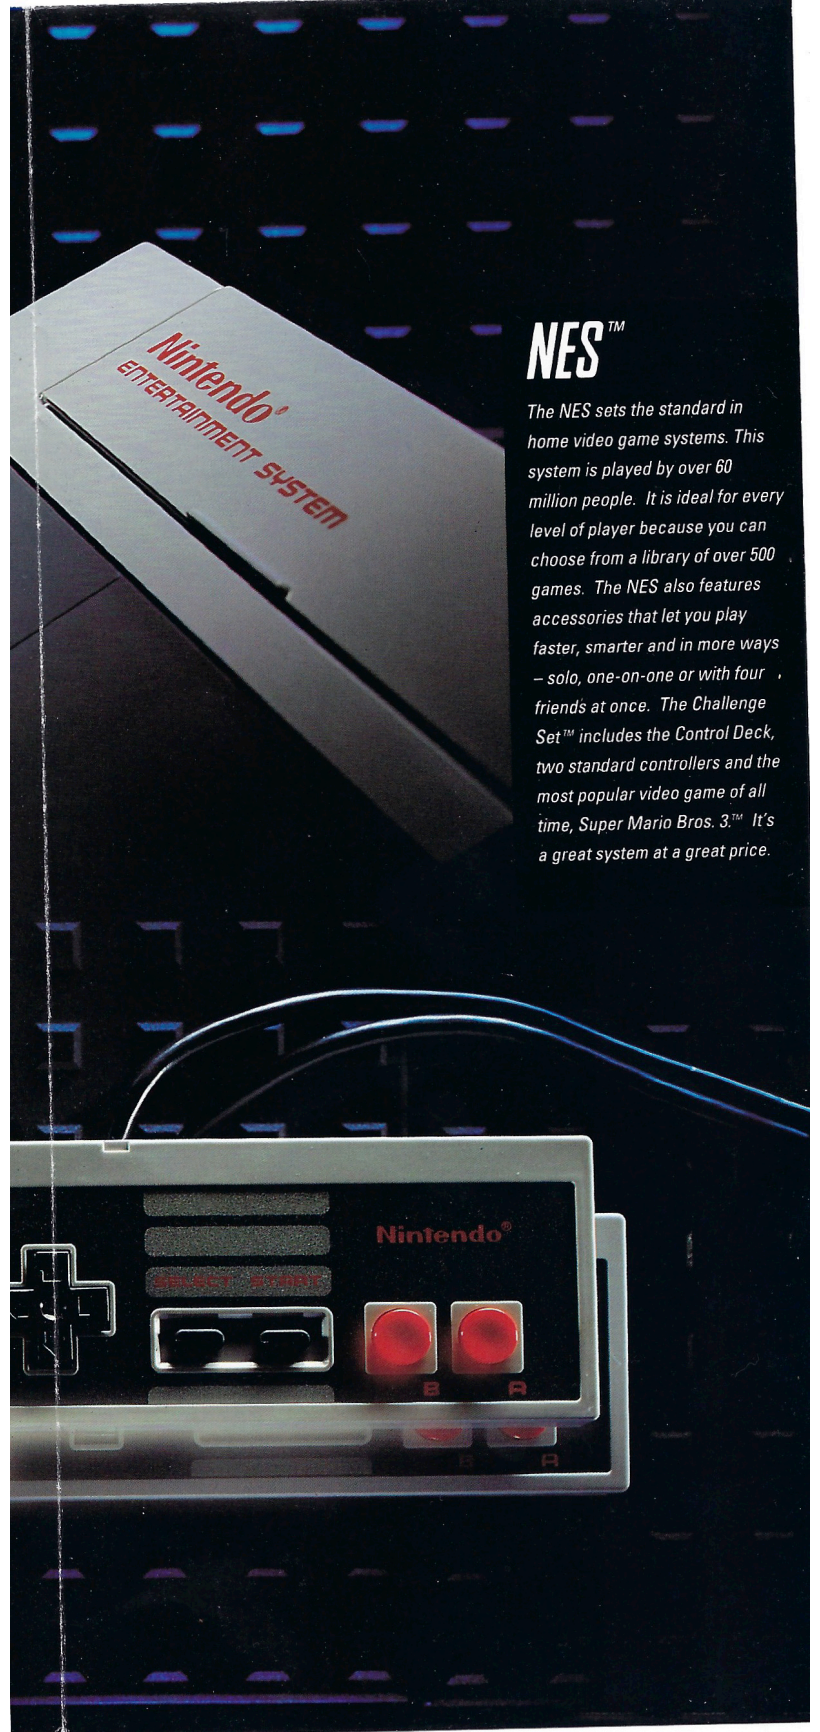


SUPER NES™

Start with a 16-bit computer that can generate over 32,000 colors. Listen to an eight-channel, true digital stereo audio section. Watch screens that rotate, scroll and spin in every direction with incredible 3-D graphics. You're experiencing the ultimate in 16-bit home video game action – the Super NES. Choose between two system configurations – the Super NES Control Set™ features the Super NES Control Deck™ and one controller. It lets you select the software you want! Or choose the complete system – the Super NES Super Set.™ It includes the Super NES Control Deck, two controllers and the latest Mario adventure – Super Mario World.™

GAME BOY®

Personal, portable power for everyone! The growing library already has 175 different games. You can choose from sports, TV quiz shows, puzzles, action or adventure games. Game Boy goes where you go, and it's powerful enough to take you wherever you want to be – your favorite golf course, the caverns of planet SR388, or the palaces of Super Mario Land™! Comes complete with stereo earphones, a Game Link™ cable for two player fun, batteries and the world-wide hit puzzle game, Tetris®!



NES™

The NES sets the standard in home video game systems. This system is played by over 60 million people. It is ideal for every level of player because you can choose from a library of over 500 games. The NES also features accessories that let you play faster, smarter and in more ways – solo, one-on-one or with four friends at once. The Challenge Set™ includes the Control Deck, two standard controllers and the most popular video game of all time, Super Mario Bros. 3.™ It's a great system at a great price.

THREE GREAT SY

HOME SYSTEMS

What are the differences between the NES and Super NES?

The Nintendo Entertainment System® is based on a custom 8-bit computer that has the power to deliver some of the most popular games in the history of home video game play. The strength of the NES is in the tremendous number of great software titles designed for every taste and interest. In its seven-year history, over 500 games have been developed for the NES, many of which are still available, and new titles are introduced every month. It is an ideal starter system and with two or four player games, it's great fun for the whole family to play together. It is also a good value, with a price that is very affordable.

The Super Nintendo Entertainment System® is based on a custom 16-bit computer and will appeal to more advanced players. There is more depth of game play and the game controller features more buttons that allow greater

It's important to remember that the Super NES is not designed to replace the NES. Both offer distinct styles of video game play. The systems are designed to be connected to the same television set. Everything you need is included so that all you do is switch between them.

What about sound and graphics?

The sound and graphics of the Super NES are advanced when compared to the NES.

However, it is important to understand that sound and graphics alone do not determine the quality of game play. This is especially true when you consider comparing the Game Boy system to the NES. Each system is popular because of the quality of its games, not only its electronics.

Why would I buy one instead of the other?

Experts say that before you buy a home computer, you should decide on what software is right for you. The same is true in choosing between the NES and Super NES. You can decide based on the games that interest you most. Both systems have something for players at every level, but some

Counselors have taken over 20 million calls from players everywhere, helping them through the puzzles and challenges of Nintendo games. We've used that direct input to design better games, better systems and create more fun. To help you get more out of the games, we publish Nintendo Power® magazine monthly. It is full of maps, tips and tactics to help you play to win!

With such popular characters, will the same games be available on all systems?

Because the technology differs so greatly between the NES, Super NES and Game Boy system, you won't find exactly the same game on each system. But you will find some of the same characters in games for each system.

With the new Super NES, why should I consider buying the NES?

Advances are still being made in 8-bit technology. These advances are found in all the latest NES games. It's all part of fulfilling our promise to the 60 million people who already own and play the NES — to provide the best ongoing entertainment value for every

Before I buy any system, what's the most important thing to know?

Nintendo is dedicated to providing the best in family entertainment. We see our hardware systems simply as doors leading to the excitement and adventure of our software. And because we are dedicated to quality entertainment, no matter which hardware system you choose, you can be assured of an unending supply of new, exciting games that will stretch the limits of your imagination. You'll also be assured of great support. Nintendo Game Counselors are ready to help you get through the tough spots of every game we sell, seven days a week. Our consumer hotline is available to help you with technical questions, warranty information, troubleshooting, even locating your nearest Nintendo dealer or authorized Nintendo World Class Service® center for on-the-spot repair and replacement. No matter which Nintendo system you choose, you can't go wrong. For more information, contact your nearest Nintendo dealer. Or call us toll-free at **1-800-255-3700.**

control. And even though the Super NES is so new, there are already over 80 software titles approved for release – with even more new titles coming every week!

SUPER NES™

For the most advanced home video game system, the Super NES offers the graphics, sound, touch and excitement of state-of-the-art technology! It also features some of the hottest software around. Games like The Legend of Zelda® – A Link to the Past,™ Super Soccer, Super Mario World® and dozens more! It also happens to have the hottest accessory around – the Super NES Super Scope 6.™ The cordless Super NES Super Scope accessory works from anywhere in the room, with an infrared sensor system that is accurate to a single television pixel. And it includes six action and puzzle games!

games may appeal more to you than others.

Can I connect both the NES and Super NES to the same television set?

Yes. The systems are designed so that both the NES and Super NES can easily be connected to the same TV set. Everything you need, including easy to follow instructions are included with the Super NES. When you have both systems, you can enjoy great video game action two different ways.

Will I be able to play my NES Game Paks on the Super NES?

No. Because the systems are so different, from the internal electronics to the design and function of the controllers, the game paks for the NES cannot be played on the Super NES. The game design for the Super NES is radically different from other systems, offering more levels of play, greater complexity, more colors and larger, more dramatic graphics. All these features require much greater processing capability than our most complex 8-bit games.

What accounts for the popularity of Nintendo characters and games?

Because the focus at Nintendo is to provide the highest entertainment value for our players, we listen closely to what you want in software and hardware. Since 1986, our Game

system we make. Add that to a great price and the biggest game library available for any system and the NES offers great fun and great value.

NES™

More hits play on the NES than any other system. From the first Mario Bros. adventure, to the newest puzzle game, Yoshi,™ the NES has set the standard for variety, fun, quality and value! Experience great sports games for virtually all sports – golf, baseball, football, soccer and tennis and more. Venture into deep space, explore strange planets or play the most popular TV game shows! The NES can take you wherever your imagination leads. And the NES features a complete line of accessories – the NES Satellite™ and NES Four Score™ expand your system for four player action on specially designed games. The NES Max® is a deluxe, ergonomically designed controller. The NES Advantage® features an arcade-style joystick and turbo power for running, jumping and firing farther and faster! It's the most complete system designed for hours and hours of adventure and fun!
